With contributions from authors of many different viewpoints, the subject is given a thorough and balanced treatment.

Among those to whom the book will be of particular interest are practitioners of animal biotechnology, and those whose interest lies in assessing its credentials, such as philosophers and social or political scientists. It also has a great deal to interest policy-makers and pressure groups, as well as more general readers. The strong chapters on the legal and regulatory framework will make it useful to those involved in advising on company policy, patenting or litigation.
