## Plant DNA Fingerprinting and Barcoding: Methods and Protocols (Methods in Molecular Biology)

Molecular cloning and DNA-based analysis have become part of every molecular life science laboratory. The rapid adoption of DNA-based techniques has been facilitated by the introduction of the polymerase chain reaction (PCR), which has made cloning and characterization of DNA quick and relatively simple. PCR is virtually part of every variation of the plethora of approaches used for DNA fingerprinting today. *Plant DNA Fingerprinting: Methods and Protocols* aims to bring together the different currently available genome-based techniques into one repository. This volume contains detailed protocols for the preparation of plant genomic DNA, fingerprinting of plants for the detection of intra-species variations, the use of DNA barcoding, as well as methods for the bioinformatic analysis of data. Also included are several discussions on the broader issues of genome-based approaches in order to provide a sound understanding of the principles of these methods. Written in the successful *Methods in Molecular Biology*<sup>TM</sup> series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible protocols, and notes on troubleshooting and avoiding known pitfalls.

Authoritative and easily accessible, *Plant DNA Fingerprinting: Methods and Protocols* is tailored principally for those who seek to augment their current methods of plant analysis and quality control using genome-based approaches as well as for scientists and researchers in different plant sciences.

### **From reader reviews:**

#### **William Leininger:**

The book Plant DNA Fingerprinting and Barcoding: Methods and Protocols (Methods in Molecular Biology) can give more knowledge and also the precise product information about everything you want. So why must we leave the great thing like a book Plant DNA Fingerprinting and Barcoding: Methods and Protocols (Methods in Molecular Biology)? A few of you have a different opinion about book. But one aim that will book can give many information for us. It is absolutely suitable. Right now, try to closer with the book. Knowledge or data that you take for that, you may give for each other; it is possible to share all of these. Book Plant DNA Fingerprinting and Barcoding: Methods and Protocols (Methods in Molecular Biology) has simple shape however, you know: it has great and large function for you. You can search the enormous world by open up and read a e-book. So it is very wonderful.

#### **Alice Lawson:**

What do you regarding book? It is not important together with you? Or just adding material if you want something to explain what yours problem? How about your free time? Or are you busy individual? If you don't have spare time to do others business, it is make one feel bored faster. And you have time? What did you do? Every individual has many questions above. The doctor has to answer that question since just their can do that will. It said that about e-book. Book is familiar in each person. Yes, it is suitable. Because start from on pre-school until university need this Plant DNA Fingerprinting and Barcoding: Methods and Protocols (Methods in Molecular Biology) to read.

#### **Melinda Anderson:**

As people who live in the particular modest era should be revise about what going on or info even knowledge to make these keep up with the era and that is always change and progress. Some of you maybe will update themselves by looking at books. It is a good choice in your case but the problems coming to you actually is you don't know what one you should start with. This Plant DNA Fingerprinting and Barcoding: Methods and Protocols (Methods in Molecular Biology) is our recommendation to make you keep up with the world. Why, because this book serves what you want and want in this era.

#### **Jean Gonzales:**

This Plant DNA Fingerprinting and Barcoding: Methods and Protocols (Methods in Molecular Biology) is great guide for you because the content and that is full of information for you who else always deal with world and have to make decision every minute. This specific book reveal it details accurately using great manage word or we can declare no rambling sentences included. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only provides straight forward sentences but tough core information with beautiful delivering sentences. Having Plant DNA Fingerprinting and Barcoding: Methods and Protocols (Methods in Molecular Biology) in your hand like getting the world in your arm, facts in it is not ridiculous a

single. We can say that no e-book that offer you world throughout ten or fifteen minute right but this guide already do that. So , this can be good reading book. Hey there Mr. and Mrs. active do you still doubt in which?
