## **Multiple-Criteria Decision Making: Concepts, Techniques, and Extensions (Mathematical Concepts and Methods in Science and Engineering) Po-Lung Yu**

This book is an outgrowth of formal graduate courses in multiple-criteria decision making (MCDM) that the author has taught at the University of Rochester, University of Texas at Austin, and University of Kansas since 1972. The purpose is, on one hand, to offer the reader an integral and systematic view of various concepts and techniques in MCDM at an "introductory" level, and, on the other hand, to provide a basic conception of the human decision mechanism, which may improve our ability to apply the techniques we have learned and may broaden our horizon for modeling human decision making. The book is written with a goal in mind that the reader should be able to assimilate and benefit from most of the concepts in the book if he has the mathematical maturity equivalent to a course in operations research or optimization theory. Good training in linear and nonlinear programming is sufficient to digest, perhaps easily, most of the concepts in the book.

### **From reader reviews:**

#### **Jerald Elliott:**

Why don't make it to become your habit? Right now, try to ready your time to do the important work, like looking for your favorite book and reading a publication. Beside you can solve your short lived problem; you can add your knowledge by the e-book entitled Multiple-Criteria Decision Making: Concepts, Techniques, and Extensions (Mathematical Concepts and Methods in Science and Engineering). Try to the actual book Multiple-Criteria Decision Making: Concepts, Techniques, and Extensions (Mathematical Concepts and Methods in Science and Engineering) as your friend. It means that it can to become your friend when you really feel alone and beside that of course make you smarter than previously. Yeah, it is very fortunate for you personally. The book makes you much more confidence because you can know everything by the book. So , let us make new experience and also knowledge with this book.

#### **Linda Monge:**

The e-book with title Multiple-Criteria Decision Making: Concepts, Techniques, and Extensions (Mathematical Concepts and Methods in Science and Engineering) possesses a lot of information that you can learn it. You can get a lot of advantage after read this book. This particular book exist new knowledge the information that exist in this reserve represented the condition of the world currently. That is important to you to find out how the improvement of the world. This book will bring you inside new era of the internationalization. You can read the e-book on the smart phone, so you can read that anywhere you want.

#### **Mary Grubb:**

Can you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Try to pick one book that you never know the inside because don't judge book by its cover may doesn't work at this point is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside look likes. Maybe you answer may be Multiple-Criteria Decision Making: Concepts, Techniques, and Extensions (Mathematical Concepts and Methods in Science and Engineering) why because the great cover that make you consider in regards to the content will not disappoint you actually. The inside or content is definitely fantastic as the outside or maybe cover. Your reading sixth sense will directly guide you to pick up this book.

#### **Violet Murray:**

Are you kind of hectic person, only have 10 or perhaps 15 minute in your day to upgrading your mind talent or thinking skill perhaps analytical thinking? Then you are having problem with the book as compared to can satisfy your short period of time to read it because this time you only find guide that need more time to be learn. Multiple-Criteria Decision Making: Concepts, Techniques, and Extensions (Mathematical Concepts and Methods in Science and Engineering) can be your answer since it can be read by an individual who have those short extra time problems.
