# Field and Galois Theory (Graduate Texts in Mathematics) (v. 167)

*Patrick Morandi*

## **Field and Galois Theory (Graduate Texts in Mathematics) (v. 167) Patrick Morandi**

In the fall of 1990, I taught Math 581 at New Mexico State University for the first time. This course on field theory is the first semester of the year-long graduate algebra course here at NMSU. In the back of my mind, I thought it would be nice someday to write a book on field theory, one of my favorite mathematical subjects, and I wrote a crude form of lecture notes that semester. Those notes sat undisturbed for three years until late in 1993 when I finally made the decision to turn the notes into a book. The notes were greatly expanded and rewritten, and they were in a form sufficient to be used as the text for Math 581 when I taught it again in the fall of 1994. Part of my desire to write a textbook was due to the nonstandard format of our graduate algebra sequence. The first semester of our sequence is field theory. Our graduate students generally pick up group and ring theory in a senior-level course prior to taking field theory. Since we start with field theory, we would have to jump into the middle of most graduate algebra textbooks. This can make reading the text difficult by not knowing what the author did before the field theory chapters. Therefore, a book devoted to field theory is desirable for us as a text. While there are a number of field theory books around, most of these were less complete than I wanted.

**From reader reviews:**

**Annette Morrison:**

Have you spare time for a day? What do you do when you have a lot more or little spare time? Yes, you can choose the suitable activity intended for spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to typically the Mall. How about open or perhaps read a book eligible Field and Galois Theory (Graduate Texts in Mathematics) (v. 167)? Maybe it is being best activity for you. You realize beside you can spend your time with your favorite's book, you can smarter than before. Do you agree with the opinion or you have some other opinion?

**Kathleen Young:**

Typically the book Field and Galois Theory (Graduate Texts in Mathematics) (v. 167) has a lot details on it. So when you make sure to read this book you can get a lot of profit. The book was authored by the very famous author. The writer makes some research before write this book. This kind of book very easy to read you can get the point easily after reading this article book.

**Stephen Ross:**

Do you one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you find out the inside because don't determine book by its cover may doesn't work this is difficult job because you are afraid that the inside maybe not because fantastic as in the outside appearance likes. Maybe you answer may be Field and Galois Theory (Graduate Texts in Mathematics) (v. 167) why because the fantastic cover that make you consider in regards to the content will not disappoint you actually. The inside or content will be fantastic as the outside or even cover. Your reading 6th sense will directly make suggestions to pick up this book.

**Ella Carlson:**

The book untitled Field and Galois Theory (Graduate Texts in Mathematics) (v. 167) contain a lot of information on the item. The writer explains your girlfriend idea with easy approach. The language is very simple to implement all the people, so do not worry, you can easy to read it. The book was authored by famous author. The author provides you in the new period of literary works. You can easily read this book because you can please read on your smart phone, or product, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site in addition to order it. Have a nice study.
