Religious Thought and the Modern Psychologies

Religious Thought and the Modern Psychologies Don S. Browning

The first edition of this book pioneered a broader and deeper critique of psychological theories and practices. Informed by hermeneutical theory, Browning's widely acclaimed work drew attention to the ethical and even religious assumptions underlying psychology and has been deeply influential in psychology, pastoral counseling, and practical theology.

In this edition, Browning and his new co-author show how the field of social science has indeed grasped and appropriated the hermeneutical approach, though with only slight appreciation of the religious dimensions of the social-scientific endeavor. The new first chapter situates the discussion, and the core chapters of the book are updated. Two other new chapters include dialogue with psychotherapeutic theorists and evangelical writers on the relation of theology and psychology. This work will set the stage for the religion-psychology conversation for years to come.
