# Electromagnetic Fields in Biological Systems (Biological Effects of Electromagnetics)

## Electromagnetic Fields in Biological Systems (Biological Effects of Electromagnetics)

As wireless technology becomes more sophisticated and accessible to more users, the interactions of electromagnetic fields with biological systems have captured the interest not only of the scientific community but also the general public. Unintended or deleterious biological effects of electromagnetic fields and radiation may indicate grounds for health and safety precautions in their use. Spanning static fields to terahertz waves, **Electromagnetic Fields in Biological Systems** explores the range of consequences these fields have on the human body.

With contributions by an array of experts, topics discussed include:

- Essential interactions and field coupling phenomena, highlighting their importance in research on biological effects and in scientific, industrial, and medical applications
- Electric field interactions in cells, focusing on ultrashort, pulsed high-intensity fields
- The effect of exposure to naturally occurring and human-made static, low-frequency, and pulsed magnetic fields in biological systems
- Dosimetry or coupling of extremely low frequency (ELF) fields into biological systems and the historical developments and recent trends in numerical dosimetry
- Mobile communication devices and the dosimetry or coupling of radiofrequency (RF) radiation into the human body
- Exposure and dosimetry associated with magnetic resonance imaging (MRI) and spectroscopy
- Available data on the interaction of terahertz radiation with biological tissues, cells, organelles, and molecules

There is great potential for communication, industrial, scientific, and medical use of electromagnetic fields and radiation. To help advance knowledge of the biological effects of such fields and to exploit their potential medical applications, this book highlights critical issues relating to their effects on living systems.

### **From reader reviews:**

#### **Robert Jones:**

Book is to be different for every single grade. Book for children until finally adult are different content. To be sure that book is very important for us. The book Electromagnetic Fields in Biological Systems (Biological Effects of Electromagnetics) was making you to know about other knowledge and of course you can take more information. It is extremely advantages for you. The guide Electromagnetic Fields in Biological Systems (Biological Effects of Electromagnetics) is not only giving you far more new information but also to get your friend when you experience bored. You can spend your current spend time to read your publication. Try to make relationship using the book Electromagnetic Fields in Biological Systems (Biological Effects of Electromagnetics). You never sense lose out for everything if you read some books.

#### **Pierre Taylor:**

The feeling that you get from Electromagnetic Fields in Biological Systems (Biological Effects of Electromagnetics) may be the more deep you looking the information that hide inside the words the more you get serious about reading it. It does not mean that this book is hard to know but Electromagnetic Fields in Biological Systems (Biological Effects of Electromagnetics) giving you thrill feeling of reading. The writer conveys their point in specific way that can be understood by simply anyone who read it because the author of this guide is well-known enough. This book also makes your current vocabulary increase well. Making it easy to understand then can go along, both in printed or e-book style are available. We suggest you for having this specific Electromagnetic Fields in Biological Systems (Biological Effects of Electromagnetics) instantly.

#### **Maryann Warren:**

Is it you who having spare time and then spend it whole day simply by watching television programs or just telling lies on the bed? Do you need something totally new? This Electromagnetic Fields in Biological Systems (Biological Effects of Electromagnetics) can be the answer, oh how comes? A book you know. You are thus out of date, spending your free time by reading in this brand-new era is common not a nerd activity. So what these textbooks have than the others?

#### **Mark York:**

That publication can make you to feel relax. This kind of book Electromagnetic Fields in Biological Systems (Biological Effects of Electromagnetics) was vibrant and of course has pictures on there. As we know that book Electromagnetic Fields in Biological Systems (Biological Effects of Electromagnetics) has many kinds or style. Start from kids until youngsters. For example Naruto or Investigator Conan you can read and believe that you are the character on there. Therefore , not at all of book are make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading this.
