Handbook of Research on Entrepreneurship in Professional Services (Research Handbooks in Business and Management series) Markus Reihlen, Andreas Werr

Professional services are increasingly seen as an important foundation for future economic growth and prosperity. Yet research on innovative and entrepreneurial processes in professional services has been surprisingly scarce. This Handbook provides a collection of original contributions from leading scholars outlining the current stock of knowledge in the area as well as providing directions for further research.

The expert contributors discuss entrepreneurship and innovation from a number of different perspectives, including the entrepreneurial professional team, the entrepreneurial firm and the institutional environment. The first part of the book looks at the challenges of entrepreneurship specific to the professional service firm while the second explores the creation and exploitation of entrepreneurial opportunities in the professional service team. Part III turns to the organization and Part IV to the management and growth of the entrepreneurial professional service firm. The final part discusses the interplay between professions, firms and the institutional environment.

Researchers, scholars and PhD students in the areas of entrepreneurship and professional service firms along with advanced students of management will find this volume of great value.
