Optical Performance Monitoring: Advanced Techniques for Next-Generation Photonic Networks

Optical Performance Monitoring: Advanced Techniques for Next-Generation Photonic Networks

This in-depth, detailed reference presents for the first time a comprehensive treatment of recent advances in optical performance monitoring. Written by leading experts in the field, the book provides an overview of recent developments in the area and the role of OPM in future optical systems and networks. Detailed discussions of various advanced techniques are provided to illustrate their principles.

FEATURES:

- Presents the principles and applications of advanced OPM techniques, together with a comparative evaluation of their effectiveness in monitoring individual parameters, such as optical signal-to-noise ratio, chromatic dispersion, and polarization mode dispersion
- Explains the principles of the various advanced optical signal processing techniques and their applications in OPM
- Examines the role and applications of OPM in optical networks, including optical transport networks, coherent optical systems, and long-haul optical transmission systems
- Discusses the current approaches of OPM in the global standard SDH/SONET

This book is ideal for technical professionals and researchers who want to understand and evaluate advanced techniques in OPM and their impact on the practical design of next-generation optical systems and networks.

- Provides a thorough and detailed discussion of the latest optical performance monitoring (OPM) techniques and their applications, presenting a comparative analysis of each method
- Contains high-quality technical contributions from leading experts, covering both principles and practical aspects of advanced OPM techniques
- Addresses challenges and opportunities related to OPM in next-generation reconfigurable optical systems and networks

From reader reviews:

Davis Miller:

Now a day those who Living in the era just where everything reachable by interact with the internet and the resources within it can be true or not demand people to be aware of each information they get. How a lot more to be smart in obtaining any information nowadays? Of course the solution is reading a book. Looking at a book can help folks out of this uncertainty Information mainly this Optical Performance Monitoring: Advanced Techniques for Next-Generation Photonic Networks book because this book offers you rich facts and knowledge. Of course the info in this book hundred per cent guarantees there is no doubt in it as you know.

Steven Williams:

A lot of people always spent their free time to vacation as well as go to the outside with them household or their friend. Are you aware? Many a lot of people spent that they free time just watching TV, or perhaps playing video games all day long. In order to try to find a new activity honestly, that is look different you can read the book. It is really fun for you personally. If you enjoy the book that you read you can spent all day long to reading a e-book. The book Optical Performance Monitoring: Advanced Techniques for Next-Generation Photonic Networks it is rather good to read. There are a lot of people who recommended this book. These were enjoying reading this book. In the event you did not have enough space to develop this book you can buy typically the e-book. You can m0ore simply to read this book through your smart phone. The price is not to fund but this book possesses high quality.

Sandra Conaway:

Do you have something that you like such as book? The reserve lovers usually prefer to select book like comic, quick story and the biggest some may be novel. Now, why not striving Optical Performance Monitoring: Advanced Techniques for Next-Generation Photonic Networks that give your fun preference will be satisfied by means of reading this book. Reading routine all over the world can be said as the means for people to know world better then how they react in the direction of the world. It can't be mentioned constantly that reading behavior only for the geeky man but for all of you who wants to always be success person. So , for all you who want to start looking at as your good habit, it is possible to pick Optical Performance Monitoring: Advanced Techniques for Next-Generation Photonic Networks become your current starter.

Lloyd Gilbert:

Within this era which is the greater man or woman or who has ability to do something more are more treasured than other. Do you want to become considered one of it? It is just simple method to have that. What you should do is just spending your time not much but quite enough to have a look at some books. One of several books in the top list in your reading list will be Optical Performance Monitoring: Advanced

Techniques for Next-Generation Photonic Networks. This book that is certainly qualified as The Hungry Mountains can get you closer in getting precious person. By looking up and review this guide you can get many advantages.
