Robot Motion: Planning and Control (Artificial Intelligence)

John M. Hollerbach, Tomas Lozano-Perez

Robot Motion: Planning and Control (Artificial Intelligence) John M. Hollerbach, Tomas Lozano-Perez

The present surge of interest in robotics can be expected to continue through the 1980s. Major research efforts are springing up throughout industry and in the universities. Senior and graduate level courses are being developed or planned in many places to prepare students to contribute to the development of the field and its industrial applications. Robot Motion will serve this emerging audience as a single source of information on current research in the field. The book brings together nineteen papers of fundamental importance to the development of a science of robotics. These are grouped in five sections: Dynamics; Trajectory Planning; Compliance and Force Control; Feedback Control; and Spatial Planning. Each section is introduced by a substantial analytical survey that lays out the problems that arise in that area of robotics and the approaches and solutions that have been tried, with an evaluation of their strengths and shortcomings. In addition, there is an overall introduction that relates robotics research to general trends in the development of artificial intelligence. Individual papers are the work of H. Hanafusa, H. Asada, N. Hogan, M. T. Mason, R. Paul, B. Shimano, M. H. Raibert, J. J. Craig, R. H. Taylor, D. E. Whitney, J. M. Hollerbach, J. Luh, M. Walker, R. J. Popplestone, A. P. Ambler, I. M. Bellos, T. LozanoPerez, E. Freund, D. F. Golla, S. C. Garg, P. C. Hughes, and K. D. Young. The editors are all research scientists at MIT's Artificial Intelligence Laboratory and in addition, Michael Brady is coeditor with Richard Paul of The International Journal of Robotics Research. Robot Motion is included in the MIT Press Artificial Intelligence Series.

From reader reviews:

Brandon Jenkins:

What do you consider book? It is just for students because they're still students or the item for all people in the world, the particular best subject for that? Only you can be answered for that query above. Every person has various personality and hobby for each other. Don't to be obligated someone or something that they don't would like do that. You must know how great as well as important the book Robot Motion: Planning and Control (Artificial Intelligence). All type of book is it possible to see on many solutions. You can look for the internet options or other social media.

Nettie Powers:

This Robot Motion: Planning and Control (Artificial Intelligence) book is not ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book will be information inside this guide incredible fresh, you will get data which is getting deeper you read a lot of information you will get. This particular Robot Motion: Planning and Control (Artificial Intelligence) without we know teach the one who reading it become critical in contemplating and analyzing. Don't become worry Robot Motion: Planning and Control (Artificial Intelligence) can bring any time you are and not make your handbag space or bookshelves' turn out to be full because you can have it in your lovely laptop even mobile phone. This Robot Motion: Planning and Control (Artificial Intelligence) having good arrangement in word and layout, so you will not feel uninterested in reading.

Shawn Howe:

This book untitled Robot Motion: Planning and Control (Artificial Intelligence) to be one of several books that best seller in this year, that's because when you read this publication you can get a lot of benefit upon it. You will easily to buy this specific book in the book retailer or you can order it by way of online. The publisher with this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Touch screen phone. So there is no reason to you personally to past this reserve from your list.

Jill Weber:

You can obtain this Robot Motion: Planning and Control (Artificial Intelligence) by look at the bookstore or Mall. Only viewing or reviewing it might to be your solve challenge if you get difficulties for your knowledge. Kinds of this book are various. Not only by written or printed and also can you enjoy this book by simply e-book. In the modern era just like now, you just looking because of your mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose appropriate ways for you.
