Aligning Modern Business Processes and Legacy Systems: A Component-Based Perspective (Cooperative Information Systems series) Willem-Jan van van den Heuvel

Distributed business component computing--the assembling of business components into electronic business processes, which interact via the Internet--caters to a new breed of enterprise systems that are flexible, relatively easy to maintain and upgrade to accommodate new business processes, and relatively simple to integrate with other enterprise systems. Companies with unwieldy, large, and heterogeneous inherited information systems--known as legacy systems--find it extremely difficult to align their old systems with novel business processes. Legacy systems are not only tightly intertwined with existing business processes and procedures but also have a brittle architecture after years of ad-hoc fixes and offer limited openness to other systems. In this book, Willem-Jan van den Heuvel provides a methodological framework that offers pragmatic techniques for aligning component-based business processes and legacy systems. Van den Heuvel's methodology is based on three building blocks: reverse engineering, which allows legacy systems to be componentized; forward engineering, which derives a set of business components from requirements of the new business processes; and alignment of new business processes and componentized legacy systems. Van den Heuvel provides a theoretical foundation for these, with chapters that discuss component-based development, introduce a case study that is used throughout the book to illustrate the methodology, and assess methods and technologies for legacy integration, component adaptation, and process alignment. He describes the methodological framework itself and its techniques to align new business processes with legacy systems by adopting a meet-in-the-middle strategy. Drawing on topics from a wide range of disciplines, including component-based development, distributed computing, business process modeling, and others, *Aligning Modern Business Processes and Legacy Systems* offers theoretically grounded practical methodology that has been explored and tested in a variety of experiments as well as some real-world projects.

From reader reviews:

Kimberly Thibault:

Book is to be different for every grade. Book for children until adult are different content. As you may know that book is very important for us. The book Aligning Modern Business Processes and Legacy Systems: A Component-Based Perspective (Cooperative Information Systems series) had been making you to know about other understanding and of course you can take more information. It is quite advantages for you. The book Aligning Modern Business Processes and Legacy Systems: A Component-Based Perspective (Cooperative Information Systems series) is not only giving you much more new information but also to become your friend when you truly feel bored. You can spend your own spend time to read your book. Try to make relationship with the book Aligning Modern Business Processes and Legacy Systems: A Component-Based Perspective (Cooperative Information Systems series). You never truly feel lose out for everything if you read some books.

Teresa Dillard:

The actual book Aligning Modern Business Processes and Legacy Systems: A Component-Based Perspective (Cooperative Information Systems series) will bring you to the new experience of reading the book. The author style to explain the idea is very unique. In the event you try to find new book to study, this book very ideal to you. The book Aligning Modern Business Processes and Legacy Systems: A Component-Based Perspective (Cooperative Information Systems series) is much recommended to you to see. You can also get the e-book through the official web site, so you can more easily to read the book.

Valarie Chamberlin:

Are you kind of hectic person, only have 10 as well as 15 minute in your day time to upgrading your mind talent or thinking skill even analytical thinking? Then you have problem with the book when compared with can satisfy your short space of time to read it because this all time you only find publication that need more time to be go through. Aligning Modern Business Processes and Legacy Systems: A Component-Based Perspective (Cooperative Information Systems series) can be your answer mainly because it can be read by you actually who have those short extra time problems.

Dona Cole:

Is it you who having spare time then spend it whole day through watching television programs or just resting on the bed? Do you need something new? This Aligning Modern Business Processes and Legacy Systems: A Component-Based Perspective (Cooperative Information Systems series) can be the solution, oh how comes? A fresh book you know. You are so out of date, spending your spare time by reading in this fresh era is common not a geek activity. So what these books have than the others?
